

Laserliner®

WoodTester Compact

Compact wood moisture instrument

Rev.1214

- Checks the degree of dryness in firewood to conserve energy and reduce emissions.
- **Simple handling:** Simply push the electrode spikes into the material.
- **LED wet/dry indicator:** 12 colour LEDs (green = dry, yellow = moist, red = wet) provide immediate measurement results for moisture content in the tested material.
- **Dual scale:** 2 different wood groups
- **Simple one-button operation**
- **Auto-Hold:** The most recent measured value is saved temporarily.
- **Stable, ergonomic housing:** The device can be comfortably held in one hand, meaning that the electrode spikes can be inserted safely.
- **Self-test function:** The instrument's accuracy can be tested by making a reference measurement with the protective cap.
- **Removable protective cap,** to protect the measuring spikes from being damaged when the device is not in use.
- **Auto power-off:** the device switches itself off automatically after 2 min. of inactivity.
- **Battery low display**

TECHNICAL DATA

MATERIALS wood (2 wood groups)
MEASUREMENT RANGE, WOOD GROUP A (beech, linden, willow, ebony) 9%...23%
MEASUREMENT RANGE, WOOD GROUP B (pedunculate oak, maple, alder, spruce, ash) 11%...27%
ACCURACY ± 2%
OPERATING TEMPERATURE 0°C...40°C
STORAGE TEMPERATURE -10°C...70°C
MAX. RELATIVE AIR HUMIDITY 85%
POWER SUPPLY 1 x 6LR61 9 V
WEIGHT (incl. battery) 140 g
DIMENSIONS (W x H x D) 58 mm x 120 mm x 30 mm

12 position wet/dry LED display

Simple one-button operation

Protective cap with self-test function
